

## **Cornwall Mining Consultants Hits £1 Million Turnover**

### **FOR IMMEDIATE RELEASE**

**20<sup>th</sup> May 2025**

Cornwall Mining Consultants, the south west's mundic, mining and ground stability experts, have hit the million-pound turnover mark, following their strongest winter for several years.

Their highest turnover to date marks their busiest year since Covid and has been complemented by the addition of four new staff members and four internal promotions. Whilst this phenomenal success is partly driven by the housing market, it is also a testament to the investments they have made to their brand, website and reports, all of which have vastly improved their customer offering.

In 2024 the company enhanced their mining searches and mundic survey offering with new reports displaying easily identifiable results using a straightforward traffic light system. Turning around expert desktop regulated mining search reports within three working days and mundic reports within 48 hours from testing, Cornwall Mining Consultants have rightly earned a reputation for producing the fastest, expert reports in the business. Their improved mining searches also include data from their unique, inhouse SecureShaft™ dataset which can enable them to clear properties without costly, intrusive investigation work, saving on both time and money.

These efforts to improve their offering have been well received across the industry and reflect the company's commitment to continually developing and enhancing their offering.

As MD Daniel Berriman explains "I am immensely proud of hitting the one-million pound mark and grateful to my fantastic team for helping us achieve this. The last few years have been challenging for so many independent businesses and we have strived to stay ahead of the curve, maintaining our position as the largest independent provider of metalliferous mining searches and mundic surveys in the region.

Winter is often a slower period for the local housing marketing but in the last quarter, we helped over 1000 homebuyers by completing a record number of mining search reports. We have also seen an uptick in demand across all our services which is fantastic and I look forward to building on this success.”

Having fixed more mine workings in the last year than ever before, and with the increasingly popularity of their new Mundic Removal Verification Service, it is clear that this Cornish business is thriving.

----- ENDS -----

### **Notes to Editor**

Cornwall Mining Consultants are the south west’s leading mining subsidence and mundic experts, holding the most comprehensive database of mining subsidence hazards and remediation data for the region. Well-established, reputable and solution-focused, they aim to keep property sales moving and assist with land development and regeneration throughout Cornwall, Devon, Somerset, Bath and the Channel Islands.
